PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience designing, developing, and scaling microservices-based backend systems, workflow automation solutions, and AWS cloud applications using Java and Python. Proficient in Java 21, Spring Boot, Camunda BPM, and AWS serverless architecture (Lambda, DynamoDB, API Gateway, SQS, SNS, SES, ECS), with experience in PCI DSS 4.0 compliance, JWT-based security, and CI/CD. Upskilling in AI/ML development including LLM agents, RAG pipelines, and LlamaIndex frameworks.

SKILLS SUMMARY

- **Languages & Frameworks:** Java 21, Python 3, SQL
- **Frameworks & Libraries:** Spring Boot, Spring Security, Spring MVC, JPA, Hibernate, AspectJ, Maven, JWT, ConfigCat, FusionAuth
- **AWS Cloud:** Lambda, API Gateway, DynamoDB, SQS, SNS, SES, ECS, EC2, S3, IAM, CloudFront, Cognito, CloudWatch, AWS SAM
- **Databases & APIs:** PostgreSQL, MySQL, Oracle DB, DynamoDB, SQLite, REST, GraphQL, SOAP, Swagger/ OpenAPI
- **AI & Automation:** LlamaIndex, RAG Pipelines, LLM Agents, Workflow Automation, Prompt Engineering
- **OOP & Design Patterns:** Factory, Singleton, Strategy, Builder, Router, Event-Driven Architecture
- **Tools & Practices:** Git, Docker, Azure DevOps CI/CD, JUnit 5, Mockito, Postman, Agile/Scrum

WORK EXPERIENCE

LPL Financial

June 2026 – Present

Engineer II | Financial Company

- Design and develop automation workflows using AWS, Camunda BPM, and Java to streamline financial operations.
- Build scalable, event-driven microservices and backend systems using Spring Boot and AWS cloud infrastructure.
- Collaborate with cross-functional, Agile teams to translate business requirements into automated workflow solutions.
- Apply OOP principles and design patterns to deliver maintainable, high-performance automation systems.

Infomerica Inc India Pvt. Ltd

January 2022 – May 2026

Senior Software Engineer | US-Based Energy Client

- Owned architecture and delivery of Java/Spring Boot microservices and AWS serverless solutions (Lambda, API Gateway, DynamoDB, SQS, SNS, SES, ECS) via AWS SAM.
- Implemented JWT-based Custom Authorizers and .p12 certificate-based security to enforce PCI DSS 4.0 compliance; built a tokenization platform for secure transaction authorization.
- Architected brand-specific and shared multi-brand cloud platform, deployed via AWS SAM and Azure DevOps CI/CD pipelines.
- Migrated and modernized legacy Tomcat-based Spring applications into containerized Spring Boot microservices on AWS ECS, including Oracle DB and redesigned UI components with jQuery.
- Delivered CMS integration across enterprise applications, replacing XML-based APIs with AEM GraphQL.
- Applied JPA, Hibernate, and Spring Security (JWT, RBAC) for data persistence and auth, and AOP for cross-cutting concerns; led architecture decisions and mentored junior developers within Agile sprints.

PROJECTS

Smart Note — AI-Powered Notes Analyser & Converter

- Built a LlamaIndex RAG pipeline with document ingestion, vector indexing, and an LLM agent for grounded Q&A, summarization, and translation.

GitHub PR Review Agent

github.com/KumarCharan-00/PR-Review-Agent

- Built a 3-agent LlamaIndex AgentWorkflow system that fetches PR context, drafts, self-validates, and posts PR review comments.
- Architected a 3-agent pipeline (ContextAgent, CommentorAgent, ReviewAndPostingAgent) using LlamaIndex AgentWorkflow with a shared state store, supporting local testing and automated CI/CD via GitHub Actions.

ISKM Proddatur Website

dev.iskmpdtr-int.cloud

- Built and deployed a full-stack Spring Boot + PostgreSQL + React web application, containerized with Docker and deployed on Dokploy in Hostinger VPS server.

EDUCATION

Bachelor of Technology - Mechanical

June 2019 – April 2023

Anurag Group of Institutions, Ghatkesar, Hyderabad

ACHIEVEMENTS

- Reduced Lambda cold start latency by 50%+ using Provisioned Concurrency and Event-Driven Architecture.
- Improved dashboard initial API load time by 67% (6s → 2s) by optimizing API calls and building an event-driven notification system.
- Enforced PCI DSS 4.0 compliance through JWT-based Custom Authorizers and .p12 certificate-based secure channels.
- Delivered zero-regression CMS migration across 3 enterprise applications (1 B2C, 2 B2B).
